Reynard Ghazy Tsaqif

Informatics Student | Front-end Developer | AI Enthusiast

Padang, West Sumatra | reynard.gtsaqif@gmail.com | +62 831-5536-7969 | linkedin.com/in/reynard-ghazy-tsaqif

Informatics student at Universitas Andalas with a focus on web development. Experienced in React, Laravel, and Tailwind CSS, currently developing skills toward full-stack development. Also has foundational knowledge in AI and data science. Eager to gain practical experience through internship opportunities.

EDUCATION

Universitas Andalas — *Padang, West Sumatra*
Bachelor of Informatics – GPA: 3.96/4.00 — Aug 2023 – Present
Relevant Courses: Web Development, Data Structures & Algorithms, Database Systems, Artificial Intelligence, Data Science

ORGANIZATIONAL & VOLUNTEER EXPERIENCES

Himpunan Mahasiswa Informatika, Universitas Andalas — *Padang, West Sumatra*
Staff of Internal Division — Jul 2024 – Jul 2025
- Coordinated internal division activities and inter-member communication for an organization of 100+ Informatics students
- Assisted in planning and executing internal events including member gatherings and organizational meetings

Laboratorium Pemrograman dan Informatika, Universitas Andalas — *Padang, West Sumatra*
Coordinator of Research and Development Division — Oct 2024 – Present
- Led R&D division initiatives, coordinating projects and knowledge-sharing sessions among laboratory members in programming and software development topics
- Contributed to improving learning and development processes within the lab

Neo Telemetri — *Padang, West Sumatra*
Frontend Web Programmer — Mar 2026 – Present
- Contributed as Frontend Developer in the Programming division under the Operational department, building web applications tailored to client requirements
- Collaborated with the Programming and MMD (UI/UX) divisions to deliver a role-based recruitment platform, adapting tech stack based on project requirements
- Actively contributing to upcoming web development projects within the organization

Community Service – KPRI — *Tarusan, Pesisir Selatan Regency*
Volunteer — Dec 2024
- Participated in community service activities focused on digital transformation in a local cooperative
- Introduced and demonstrated the use of a cooperative website to members and stakeholders
- Assisted in delivering information to improve service accessibility and transparency

PROJECTS

UNAND Co-Workspace (UCW) App — *Universitas Andalas*
Frontend Developer — Apr 2026 – Present
- Developed a QR-based coffee shop management system with self-ordering, real-time order tracking, and AI-powered analytics (serving time estimation, menu popularity, sentiment analysis)
- Built 12+ pages for the Customer App (mobile-first) covering menu browsing, cart, payment flow, and order tracking using React 18 + Inertia.js v2
- Implemented real-time UI updates via Laravel Reverb + Laravel Echo for live order status notifications
- Collaborated in a 3-person team (UI/UX, Frontend, Backend) following structured documentation (SRS, UML, wireframe)

Open Recruitment Website – Neo Telemetri — *Universitas Andalas*
Frontend Developer — Mar 2026 – Apr 2026
- Built a full-featured recruitment platform using React.js and Tailwind CSS, supporting two roles (Admin & User) with 8+ distinct feature modules
- Implemented QR-based attendance system and QRIS payment integration with real-time scan functionality on the frontend

- Developed online exam module including dynamic question rendering and result display, integrated with NestJS REST API
- Built document verification and task submission workflows with multi-state UI (pending, verified, rejected) for seamless admin-user interaction
- Collaborated in a 3-person team (UI/UX, Frontend, Backend) using component-based architecture to deliver consistent design across 10+ pages
- Designed role-based access control (RBAC) UI, rendering different dashboards, navigation, and features based on user role

Indonesian Spice Image Classification *Universitas Andalas*
AI/ML Engineer Dec 2025

- Built an image classification model using MobileNetV2 with transfer learning to classify 31 classes of Indonesian spices from 6,510 images
- Applied preprocessing pipeline including data augmentation (rotation, flip, zoom, shift), pixel normalization, and 70/15/15 train-val-test split
- Achieved 89.21% test accuracy with average F1-score of 0.89, evaluated using precision, recall, and confusion matrix analysis
- Implemented callbacks (EarlyStopping, ReduceLROnPlateau, ModelCheckpoint) to ensure stable and efficient training
- Built using Python, TensorFlow/Keras on Google Colab with potential deployment to web/mobile via TensorFlow Lite or TensorFlow.js

Informatics Department Website *Universitas Andalas*
Full-Stack Developer Sep 2025 – Nov 2025

- Developed a departmental web system using Laravel to digitize the Final Project (Tugas Akhir) submission and monitoring workflow end-to-end
- Built student-facing forms for thesis proposal submission, progress reporting, and document upload with validation
- Implemented admin panel for supervising lecturers to review submissions, update status, and manage student data
- Collaborated directly with the Informatics Department to gather requirements and iterate on system design

E-Commerce Web Application *Metro Institute*
Frontend Developer Jul 2025 – Sep 2025

- Built a full-stack e-commerce platform frontend with React.js and Tailwind CSS, covering 10+ pages across user and admin flows
- Developed multi-step checkout UI with shipping form, payment method selection, and order summary, integrated with NestJS/Express REST API
- Implemented product catalog with search autocomplete, category filtering, price range slider, and sort functionality
- Built shopping cart with real-time quantity update, subtotal calculation, and localStorage persistence for guest users
- Developed admin dashboard with order management, product CRUD, and basic analytics (revenue chart, stats cards)

Programming Laboratory Website *Universitas Andalas*
Full-Stack Developer Dec 2024

- Developed a laboratory profile website using Laravel with 5 main sections: landing page, about (vision/mission, history, organizational structure), news, gallery, and practicum materials per course
- Built content management system (CMS) for admins to manage news articles, gallery uploads, and practicum modules per mata kuliah
- Ensured responsive and structured layout for easy navigation by students and staff

Informatics Student Association Website *Universitas Andalas*
Frontend Developer Dec 2024

- Developed the official HIMA Informatika website using vanilla HTML, CSS, and JavaScript with 5 main sections: home, profile (vision/mission, organizational structure), work programs per division, activities, and information board
- Built fully static frontend with structured navigation and responsive layout for students to access organization info and upcoming events

SKILLS & LANGUAGES

Technical Skills: React.js, Laravel, Tailwind CSS, HTML/CSS/JavaScript, Inertia.js, Git & GitHub, REST API Integration, MySQL, PHP, NestJS, Python, TensorFlow/Keras

Soft Skills: Team Collaboration, Agile/Scrum Workflow, Requirements Gathering, Technical Documentation (SRS, UML)

Languages: Indonesian (Native), English (Professional Working Proficiency)
